

The Collaborative Process: A Guide for Separating Couples

The Role of a Pensions Expert

A pensions expert is someone who has specialised knowledge in the area of pensions and can be a valuable neutral expert.

After the family or shared home, the pension may be the most valuable asset of a separating couple. An Order to the pension trustees which directs the division or preservation a pension, is known as a pension adjustment order.

A pensions expert may assist in not only in the drafting of any agreed pension adjustment order so that it can be implemented properly by the Trustees of the pension, but also in clarifying the financial implications on all of the parties of a proposed pension adjustment order.

Separate pension adjustment orders are required for each separate private pension arrangement that exists.

All the financial resources available are considered before making a pension adjustment order.
